WHAT IS A CORN?

CORNS are tubercular hard-looking ex-

cesses of the toes and feet. They

are situated on the outside of the little toes,

on the sides of the feet, and between the

toes; in some individuals all the prominent

parts of the feet are invaded by undue pres-

sure caused by wearing narrow shoes, or

improperly-made boots or shoes.

Those afflicted with Corns cut the surface

of the corns, or have the corns pared by

incompetent or unskilled persons; the con-

sequence is, the more the corns are cut

the larger they grow, extending itself

and out of the same surface several Corns

are formed in the course of time and en-

couraged by the frequent cutting of the

upper parts of the Corns. The use of

acids, lunar caustic, Aquafortis, and other

remedies produce inflammation and swell-

ing, give rise to abscesses, which are fol-

lowed by serious consequences too numerous

to mention.

WHAT MUST BE DONE?

The germ of the evil, which

is the root,

must be removed, that is to say, remove

the white points forming a kind of eyelid.

M. SCHLOSSER,

Author of

Several Treatises on Diseases of the Feet.

IN THE ONLY ONE

who has received the highest praises from

the leading European and American papers,

as well as from the highest Medical Men for

Corns, Bunions, Soft Corns and in-growing

nails, allowing the patient to put on his

shoes and walking away immediately after-

wards, without inconvenience, he is proved

by more than 10,000 testimonials. Among

these are some from Imperial Royal Fam-
